

# TEAM COMMS SYSTEM

## PRODUCT OVERVIEW

The Reach Systems team comms system provides clear and reliable wired communication for personnel operating in confined spaces and hazardous locations. It is designed to be trailer mounted in a standard 19-inch rackmount enclosure but can be adapted for portable applications.

The standard system supports up to headsets and up to 90 m [300 ft] of user cable per channel. The built-in daisy-chain feature allows multiple boxes to be connected together, providing almost unlimited expansion capability.
